

HIGH DEFINITION VEHICLE INSURANCE

Deployment made simple.

Once you bind your HDVI Shift policy, onboarding is quick and hassle-free. We prepare you to start using our safety tools to take control of your business and your insurance costs. From setting up telematics to training on the safety tools provided to you, we work with you to customize our deployment plan and schedule to meet your operational needs.

1 Set up your telematics

The HDVI team will help you specify the right gear and get the systems connected to the HDVI cloud so we can begin analyzing your data.

2 Get set up and trained on safety tools

HDVI Fleet Services trains you on the fleet portal tools, dashboards, and reports you will use to monitor fleet and driver activity and coach drivers.

3 Use your new tools to improve safety and increase insurance discounts

The HDVI team will help you specify the right gear and get the systems connected to the HDVI cloud so we can begin analyzing your data.

Fast, easy deployment process.

Deployment is easy and can be accomplished within thirty days, but may take longer if dash cams need to be installed. We work with you to develop a deployment schedule that meets your operational needs.
